**Additional Hearing Information:**

The Division of Remediation believes it is necessary to add the Walker Machine Products site located at 459 Washington Street, in Collierville, Shelby County, Tennessee. This site was used to produce automated machine screw products, beginning in 1953 until it ceased operations in 2002. There are several industrial properties in the vicinity of the site and a residential neighborhood nearby. The property is currently being used by the Langley Wire Cloth Company, which is not the source of the contamination at the site.

Walker Machine Products used chlorinated solvents for cleaning and degreasing their finished products. Soil, surface water, groundwater and air pathway investigations have determine that the site has been contaminated with chlorinated solvents. The groundwater contaminant plume is impacting Collierville's Water Plant #1 located about ½ mile away.

In April 2014, the EPA added this site to the National Priority List. In order to complete the necessary remedial

actions on the site, the Division of Remediation proposes to amend Rule 0400-15-01-.13 List of Inactive Hazardous Substance Sites by adding Walker Machine Products site to its list of sites.

Oral or written comments are invited at the hearing. In addition, written comments may be submitted to Tim Stewart at the Division of Remediation, William R. Snodgrass Tennessee Tower, 312 Rosa L. Parks Avenue, 14th Floor, Nashville, Tennessee 37243, prior to or following the public hearing. However, the Division must receive comments in its Central Office by 4:30 p.m. (CST), December 1, 2015, in order to assure consideration.

Copies of draft amendment are available for review in the Public Access Area of the:
